RECOMMENDATION FLOW

How Echo chooses your news

Your interests set the starting point. Your behavior tunes the next edition.

FROM READER SIGNALS TO A PERSONALIZED EDITION

1 YOUR PROFILE

Start with your interests

Onboarding sets topic weights:
selected topics start at 0.70;
others start at 0.20.
Your profile stays with your
cookie-linked reader ID.

2 AVAILABLE STORIES

Build the candidate pool

RSS feeds provide articles
across 8 topics. Echo removes
duplicates and avoids recently
shown stories when enough
fresh alternatives exist.

3 SCORE EACH STORY

Match + freshness

Topic interest weight
+ freshness x 0.12
+ image bonus 0.025
+ excerpt bonus 0.015
Higher scores rank first.

4 BUILD THE MIX

Personalized + varied

Preferred topics: weight > 0.25
(or top 3 if none qualify).
Avoid repeated headlines/topics.
Lower-weight topics can fill
the discovery section.

5 YOUR EDITION

Read and respond

1 lead story
Up to 4 secondary stories
Up to 6 brief stories
Up to 2 discovery stories
Saved for this UTC date.

THE LEARNING LOOP

Your actions adjust topic weights over time - the next edition uses the updated profile.

CLICK	QUALIFIED READ	LIKE	SKIP	UPDATE PROFILE
+0.015	+0.07	+0.18	-0.14	weights 0 to 1

45-DAY HALF-LIFE | FEEDBACK OLDER THAN 180 DAYS EXPIRES

AI ROLE Gemini summarizes selected stories using publisher context; it does not select the articles.

REGENERATE Rebuilds today’s edition using your latest saved feedback and current article pool.
